OBJECTIVE

My objective is to gain as much experience as I can during my university studies. I aim to have an internship in an IT oriented company where I can learn how computer science/development is applied in the real business world.

EDUCATION

Computer Engineering and Informatics | Cyprus University of Technology
SEPTEMBER 2018 – PRESENT

Key project/studies at University

- Have attended C, C++ and Java classes
- Have attended Data Structures and Algorithms class
- Created a compiler with C and flex/bison tools

EXPERIENCE

Lobby Cleaner | Caffe Néro
MAY 2019 – AUG 2019 (SUMMER JOB)

Used to work under pressure in a fast- moving environment in order to meet the clients' expectations. Also, working with clients gave me very good customer service and communication skills. Working at a cafe has made my teamwork skills better.

SKILLS

- Familiar with C/C++, Java, VB.NET and Python and knowledge of programming fundamentals
- Good knowledge of computer hardware
- Basic knowledge of the concepts of Data Structures and Algorithms
- Good at working in team projects
- Customer service

ACTIVITIES

Apart from computers and Computer Science, I enjoy reading about automobiles and engineering as well as I closely follow F1. I am also interested in studying about business and economics and have taken a few online courses for learning subjects like CFD/Forex Trading.
